

Welcome to the current edition of our Catalogue.

FMC commenced operation in the U.K. in 1991. Originally our specific goal was to provide a high quality product and first class service geared to the Earthmoving and Mining aftermarkets for supply of common friction parts throughout the world.

This catalogue is testament to our success and history. We have developed a vast array of friction, clutch, brake and mating plates, all of which are manufactured by us and supplied in original specification materials and available for purchase.

Our products are precision engineered in our own state-of-the-art production facilities in Nottinghamshire. This ensures the quality of raw materials and the quality throughout all manufacturing processes to the final inspection. Other products are specifically manufactured from our tooling at key manufacturing plants around the world. These plants play a strategic role in the OEM supply of materials to our market.

Our two facilities in the U.K. hold key individual roles:

**Leighton Buzzard;**

Our principle office & warehouse for Sales,  
Ordering parts,  
Storage, packing,  
Distribution and shipping.

**Sutton-in-Ashfield;**

Research & development,  
Design,  
Manufacturing,  
Engineering and  
technology centre.

All of our products are available from our UK warehouse or via specialist distributors located around the world.

Our current strategy is to continue to develop our market by introducing new friction discs to meet increasing demand from our customers and to a diverse market. Also to advance friction technology by working with clients in developing bespoke vehicle and machinery friction solutions.

**Note:**

This catalogue is also available on-line at our website. <http://www.frictionmarketing.co.uk/>
